

Health and safety remediation - rebate eligibility confirmed

From: CleanBC Better Homes Energy Savings Program <betterhomesESP@clearesult.com>
To: MiniMe Contracting Company <service@minimecontracting.ca>
Date: Wednesday, July 8, 2026 at 10:14 AM

Hello Alex,

We have reviewed the health and safety remediation request submitted for the following Energy Savings Program project:

PROJECT DETAILS	
PARTICIPANT	Jordan Lee
INSTALLATION SITE	27 Cedar Ridge Road, Port Hardy, BC V0N 2P0
ELIGIBILITY CODE	ESP1-DEMO0730 Income Level 1
ASSOCIATED UPGRADE	Natural-gas furnace conversion to an eligible central ducted heat pump
REQUESTED REMEDIATION	Localized attic mould treatment at the planned air-handler platform and duct-access route

CONFIRMATION

The described existing mould remediation is confirmed as rebate-eligible before remediation begins because it is required to enable the safe installation and operation of the associated eligible heat pump. The Income Level 1 rebate is 95% of eligible health and safety remediation costs, up to a maximum of \$800 per home.

Please retain this confirmation with the application record. The final submission must include:

- An invoice itemizing the remediation cost and CleanBC rebate credit.
- Before and after photographs of the issue that was remediated.
- Evidence that the associated eligible heat-pump installation was completed.

This confirmation applies to the scope described above. Any materially different scope should be referred back to the program before work begins.

Regards,
Program Support Team
