

WETT Level 1 Visual Inspection Report

Wood-burning system condition recorded before decommissioning

REPORT NUMBER
WETT-DEMO-0730
SYNTHETIC DEMO

PROPERTY OWNER / INSTALLATION SITE

Jordan Lee
27 Cedar Ridge Road
Port Hardy, BC V0N 2P0

INSPECTION DETAILS

Requested: July 22, 2026
Inspected: July 23, 2026
Purpose: Pre-removal condition record

Inspector information

INSPECTOR
Morgan Patel

WETT NUMBER
DEMO-718

INSPECTION COMPANY
North Coast Hearth Safety

Demonstration notice: All names, addresses, identifiers, observations, and signatures in this report are fictional. This is test data and is not a valid WETT inspection or certification.

Appliance and venting identification

Appliance type	Freestanding, manually fuelled wood stove
Manufacturer / model	Pacific Energy / Super LE (demonstration record)
Fuel	Seasoned cordwood
Location	Main-floor living room, exterior-wall installation
Connector	Single-wall black steel connector, approximately 150 mm (6 in.) diameter
Chimney system	Factory-built insulated chimney passing vertically through ceiling and roof
Data plate	Present and legible at time of inspection

Level 1 visual inspection observations

Inspection item	Observed condition	Result
General appliance condition	Normal signs of use; door, latch, glass and firebox visually intact.	Observed
Floor protection	Non-combustible hearth pad present beneath and in front of appliance.	Observed
Connector condition	Sections secured; no visible perforation or heavy external corrosion.	Observed
Clearance context	Surrounding wall, floor and nearby furnishings recorded photographically before removal.	Recorded
Chimney exterior	Visible portions viewed from accessible areas only; no destructive investigation performed.	Limited visual

Scope note: This Level 1 report records readily accessible, visible conditions on the inspection date. It does not include disassembly, concealed-space investigation, code-compliance certification, performance testing, or an opinion on insurance suitability.

Inspection Findings and Removal Record

Companion report to invoice MES-20260730-001

REPORT NUMBER
WETT-DEMO-0730

Inspection findings

- ✓ The wood stove and visible connector were present when the pre-removal inspection was conducted.
- ✓ The appliance was not fired or operated as part of this inspection.
- ✓ No active smoke, fire, or immediate hazardous condition was observed during the visual visit.
- ✓ The inspection was requested to document the former wood-heating system before conversion to an electric air-source heat pump.
- ✓ Matched photographs were requested to record the room before removal and after the new heat-pump installation.

Decommissioning and upgrade record

Removal contractor	Mini Home Energy Solutions, 100 Demo Way, Victoria, BC V8V 1V1
Removal date	July 25, 2026
Wood appliance disposition	Disconnected, removed from the home, and transported for recycling.
Interior completion	Connector and visible wall collar removed; interior wall penetration and floor area professionally finished.
Replacement primary system	TOSOT cold-climate air-source heat pump, outdoor unit TU36-24WADU with indoor air handler TUD36-24AH2ADU.
Heat-pump completion date	July 29, 2026
Related invoice	Mini Home Energy Solutions invoice MES-20260730-001, issued July 30, 2026.

Conclusion

The former wood-burning appliance was visually documented before its planned decommissioning. This report, the contractor invoice, and the matched before-and-after photographs together provide a synthetic demonstration record of a wood-to-heat-pump conversion. No statement in this demonstration report should be relied upon as an actual WETT certification, code-compliance determination, or property-specific safety opinion.
