Heat pump water heater

Electric resistance tank replacement

Installation completed August 8, 2026. The home's existing electric resistance storage water heater was its primary water-heating system. It was removed and recycled, then replaced by one new heat pump water heater serving the home. The home did not previously have a heat pump water heater, and this installation is not a secondary or additional water-heating system.

QTY	DESCRIPTION	AMOUNT
1	Midea hybrid heat pump water heater — 50 US gallon Supply and installation of Midea model MCHW-50VN3A , 240 V hybrid heat pump water heater, including water connections, condensate routing, expansion tank, vacuum breaker, electrical connection, commissioning, and participant orientation.
