Work completed: July 29, 2026

Terms: Due on receipt

PO: JLEE-2026-07

Home-energy upgrade work completed

Supply and installation at the address shown above. All amounts are in Canadian dollars.

Description	Qty	Amount
1 — Air source heat pump: conversion from wood heating		
Cold-climate air-source heat-pump system — supply and installation TOSOT outdoor unit TU36-24WADU with indoor air handler TUD36-24AH2ADU; includes refrigeration lines, controls, commissioning, and homeowner orientation. New heat pump is the primary heating system.	1	\$15,850.00
Existing wood-heating system decommissioning and removal Disconnected and removed freestanding wood stove and vent connector; sealed interior penetration and transported appliance for recycling. Before-and-after photographs and WETT visual inspection report supplied.	1	\$2,900.00
2 — Ventilation upgrade		
ENERGY STAR certified bathroom exhaust fan — supply and installation ACIQ model AEP110, ENERGY STAR Unique ID 3629726; 110 CFM nominal airflow. Includes insulated ducting to exterior, damper, wall control, grille, air sealing, and functional test.	1	\$1,650.00
3 — Electrical service upgrade		
200-amp electrical service and panel upgrade Replace existing 100-amp service with 200-amp service and 40-space panel; new meter base, mast, grounding and bonding, labelled breakers, electrical permit, utility coordination, inspection, and energization. Includes dedicated heat-pump circuit and disconnect.	1	\$8,900.00

SUPPORTING DOCUMENTATION SUPPLIED

- Matched before-and-after installation photographs.
- WETT Level 1 visual inspection report documenting the pre-removal wood appliance.
- ACIQ AEP110 ENERGY STAR label and product specification sheet.

Subtotal	\$29,300.00
GST (5%)	\$1,465.00
Payments	\$0.00
Total due	\$30,765.00

Contractor confirmation: The work described above was completed at the installation address on July 29, 2026. Equipment was installed and commissioned in accordance with manufacturer instructions and applicable permits. This invoice and all companion files are synthetic test data created solely for a software demonstration.
