ITEM	QTY	UNIT PRICE	TOTAL
SPRAY FOAM DISCLAIMER - Polyurethane foam is applied at very high pressure and temperature, causing variations in the final (cured) thickness. On average, the foam will be applied within +/- 1/4 inch of the quoted thickness. Depending on the surface and environmental conditions, variations can be larger than +/- 1/4 inch. - Spray foam is not to be considered a finished product for aesthetic purposes. -The Installation of polyurethane foam insulation also requires a fire protective thermal barrier (as per the National Building Code) and must not be left exposed. - It is the homeowners responsibility to ensure that all surfaces to be spray foamed are CLEAN and DRY. Spray foam cannot be applied to wet surfaces or surfaces with loose debris on them. This will trigger extra charges for a second visit. Very important to let our dispatch team know of such issues prior to technicians arriving to your home or business. We recommend adding heaters and a dehumidifier at least 72 hours prior to job start. - Greenfoot requires clear access to all surfaces that are being insulated. Any items within the work area that require removal by our personnel will incur a standby charge for the truck of \$200.00 per hour. We are not liable for any damage incurred when moving client's possessions. - Greenfoot requires 48 hours notice for any scheduling changes or a \$100 surcharge will apply. - CSA standards require that all persons and house pets must not re-enter the property/ job-site during the installation of SPUF and for 24 hours after the installation is complete.	0.00	\$0.00	\$0.00
